

## Ostinato™ Decorative Papers

Using our brand of Royal Papers and sourced Wall Coverings, you can create your own works of art, possibly as feature pieces, or decorative laminated glass panels for elevator cabs, framed and back lit elevations, backsplashes, cabinet doors and even horizontal surfaces for credenza tops. Our aluminum backing allows for numerous options.

Royal Papers (shown above and right) come in sheets 22" wide x 32" tall from edge to edge. We don't see that as a limitation, only a challenge of one's creativity.

The current line of wall covering material we are using, shown too the right, is rather couture. Most are available in rolls 45" wide, with maybe 500 to 1000 linear feet. These can be used just like the Royal Papers, or within an elevation where you might already be using the wall covering, but need something with a little more resistance to wear - in certain applications.

We will also be happy to see if one of your own specified wall coverings will work within our lamination process.
