

Ostinato™ Fabrics

Similar to the idea of laminating decorative papers and wall coverings into our glass, we have also been asked to supply specialty fabrics laminated.

With such a wide selection of fabric, especially from the “Garment District” of NYC, we’ve provided some very interesting things for our customers’ demands.

The most interesting project was to laminate actual OBI into tiles which were used as feature pieces in the flooring of a trade show booth at Masion d’Objet in Paris, as shown left and far left.

As another example, shown below, the three colors in our Azimuth Collection, Blush, Bashful and Champagne.

Azimuth Blush

Azimuth Bashful

Azimuth Champagne

We would be happy to run tests on fabrics provided by our customers who are interested in providing their own fabric for us to laminate.
