

Vivente™ Laminated Glass - Bark Skins

Bark Skins have been made for centuries by Native Indians throughout the Americas, and the World. Produced from actual tree bark, colors can be added to the fibrous pulp mixture before it is laid out to dry. It's a completely natural process.

Vivente™ lamination, allows us to use other patterns than just the solids we typically use in our Ostinato™ lamination. It also allows us to manipulate the background, either with color or the use of colored mirror to bring out more depth within the composition. Some examples of our Vivente™ Laminated Bark Skins are shown here.

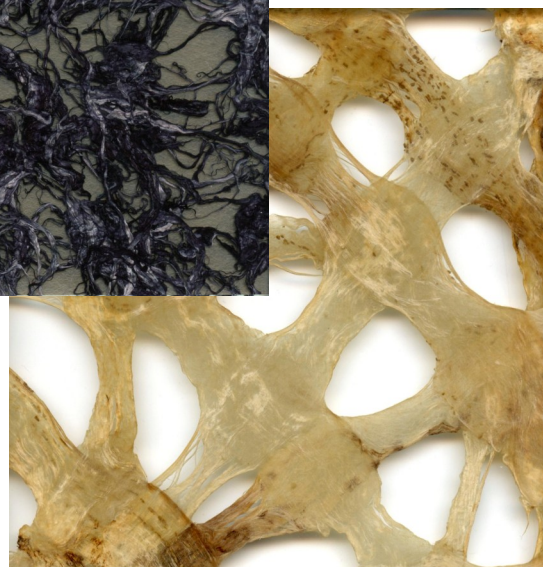

*Azure Blue Solid -
1/2" Low Iron*

*Spiderweb Straw -
1/2" Low Iron*

*Cinnamon Lace over
Bronze Mirror 1/2" Low*
